

Touchless Hand Sanatizer Dispenser Coro-App Smart

This dispenser was developed to spray hand sanitizer without the need for physical contact within private as well as commercial environments. An infrared sensor that reliably triggers at a distance of 10 cm controls the delivery from the integrated tank. The dispenser is not being contaminated due to the contactless operation. The 1200 ml tank is typically filled with disinfectant, liquid soap or other substances of similar consistency. To ensure hygiene standards, the tank should be filled under aseptic conditions, for example by a pharmacy.

Due to the compact design, the dispenser can be installed even in tight spaces.
The power supply can be provided by 4x C batteries or by a 6V 1A power supply unit.

Technical data:

Base material	ABS
Storage tank	1200 ml, refillable
Operating voltage	6V (4x1,5 Type C or 6V 1A DC power adapter (5,5x2,1 +Pol inside), not included)
Installation	Wall mounted
Weight	0,8 kg (without liquid)
Output	ca. 0,8 ml depending on the liquid used (when using the spraynozzle)
Size (cm)	26 (+20 tray) x16x12
